Award Winning Digital Photography Projects for the Classroom

Teacher's Edition

Includes:

- Student projects
- Teacher lesson plans
- Picture making tips
- Working with digital image files
- Camera management tips
- Classroom and project management tips
- Useful resources and Web links
- Standards addressed by the projects

Step-by-step instructions for doing great things with your pictures.

Here are **64 award winning ideas and projects** for using digital photography and digital imaging in the classroom. Some of these are productivity ideas; others are curriculum-based projects. None of the projects described here require expensive camera equipment or difficult techniques.

Grades 6 and Up

Each project includes a student worksheet written for students to use. There are tips on how to take better pictures in a chapter after the worksheets. The last chapter includes tips on how to import your pictures into the computer and how to insert them into various programs,

such as **PowerPoint, iMovie, or a Web page.** The step-by-step instructions will work with a variety of software, but we have focused on instructions for using **Adobe Photoshop Elements.**

You learn from doing these projects in two ways. First you learn about the subject from the content of the finished project... for example, you learn geography by doing a project involving taking pictures of weather patterns. But you also learn about the subject in the creating of the project... in other words; it's just as much about the process as the product.

Projects include:

- The Week That Was
- Which is the Fake?
- Music Into Pictures
- Story Starters
- Stop Motion Photography
- Politics and Pictures
- Fraction Photos
- Illustrating Emotions
